SUMMARY

Product Designer with 5+ years of experience specializing in complex B2B and B2C digital products — including enterprise SaaS, healthcare, and CRM platforms. Proven track record of designing AI-powered features, scalable design systems, and multi-role experiences that reduce friction and improve product adoption.

Expert in leading the full design lifecycle, from research and problem framing to high-fidelity delivery and design system implementation. Recently focused on AI-assisted workflows, prompt design, and integrating agent-powered features into existing products.

Experienced collaborator and design systems advocate, partnering closely with PMs and engineers to ship accessible, production-ready interfaces and maintain consistent UI across teams.

SKILLS

UX

User Research, Usability Testing, Information Architecture, User Flows, CJM, A/B Testing

UI

Design Systems, Responsive Design, Accessibility, Visual Design (Typography, Color, Layout)

AI & Automation

AI-assisted UX workflows, prompt design, AI feature design

AI-powered prototyping (Claude, Figma Make, Lovable)

Tools

Figma, FigJam, Miro, Webflow, Jira, ClickUp, Adobe Photoshop

EXPERIENCE

Internal AI Platform (Enterprise)

Product Designer

07/2025 – Present

- Joined an existing AI platform and contributed to the design of new features and system improvements
- Designed “Apps” integration feature, enabling users to access and interact with tools within the AI chat environment
- Led design system improvements: restructuring UI kit, variables, and design tokens
- Standardized design tokens and variables to ensure scalability and consistency across the product
- Created component guidelines and documentation to support cross-team alignment
- Improved consistency and maintainability of UI through reusable components and systemization
- Collaborated with product managers and developers to align design solutions with product requirements

AI Document Analysis Platform (Enterprise SaaS)

Product Designer

01/2025 – 07/2025

- Designed end-to-end AI chat experience for document analysis, including answer validation, references, and error states
- Defined UX patterns for AI interactions (prompting, re-asking, flagged responses), improving trust in AI outputs
- Leveraged AI prototyping tools (Figma Make, Lovable) to accelerate UX concept validation
- Designed scalable document management flows for large datasets
- Built CRM-style tables with advanced filtering, sorting, and search
- Created and maintained a scalable design system

- Collaborated with developers to implement complex AI chat and data interaction logic

HealthConnect (Healthcare SaaS)

UX/UI Designer

03/2024 – 01/2025

- Designed multi-role system (Doctor, Patient, Attorney) with tailored user experiences
- Created end-to-end patient journey: onboarding, scheduling, and video consultations
- Designed mobile app with step-based flows to improve form completion rates
- Developed CRM tables for managing patient data
- Built design system and reusable UI components
- Ensured responsive design across devices

BrandingOptics (CRM Platform)

UX/UI Designer

02/2023 – 03/2024

- Designed CRM platform for booking, subscriptions, and client communication
- Created user flows, sitemaps, and high-fidelity prototypes
- Redesigned UI components (modals, emails, buttons) to improve usability
- Designed subscription and booking flows
- Developed UI guidelines and style system

Pigeebak (Social Platform)

UX/UI Designer

07/2022 – 02/2023

- Conducted user research (interviews, surveys)
- Designed core features for media sharing and collaboration
- Created user flows and wireframes for Ads Collaboration feature

- Designed interactive UI components (media players, forms, playlists)
- Collaborated with senior designers on UX improvements

PROJECT HIGHLIGHTS

- AI-powered enterprise chat for document analysis
- Internal AI platform with skills and applications ecosystem
- Multi-role healthcare platform (web + mobile)
- CRM systems with complex data tables and workflows

EDUCATION

Master of Arts – Philology
The National Academy of the National Guard of Ukraine
